

**DEPARTMENT OF THE AIR FORCE
HEADQUARTERS 5TH BOMB WING (AFGSC)
MINOT AIR FORCE BASE NORTH DAKOTA**

18 September 2024

MEMORANDUM FOR MINOT AFB PERSONNEL

FROM: 5 BW/CC

SUBJECT: Environmental Policy Statement

1. At Minot AFB, protecting the environment is one of our highest priorities and will be a factor in decision making. Minot AFB is committed to repairing environmental damage from its activities of the past, executing its current operations within environmental standards applicable to its dual Wing mission and calculating its future activities to minimize environmental impacts. Minot AFB aims to conserve, protect, and enhance regionally identified plant and animal species of conservation priority while enhancing climate resilience through active habitat management. Environmental objects and targets have been set for Minot AFB and will be reviewed periodically for effectiveness in achieving these commitments.

2. Minot AFB shall conduct its missions according to Federal, Department of Defense, Air Force, State, and local environmental policy. The environmental policy is communicated to base personnel through the Minot AFB Environmental, Safety and Occupational Health Council, the internet, and unit information boards.

3. This Minot AFB Environmental Policy is implemented through a program based on PRIDE:

P. Pollution Prevention – preventing environmental pollution and waste

R. Regulation – complying with all applicable regulations and legal requirements

I. Integration – integrating environmental information into all levels of management

D. Dedication – dedication to continual improvements

E. Environmental – promoting conservation and sustainable use of all materials

4. Conformance with this policy is the responsibility of all Minot AFB team members and is vital to our continued environmental excellence and mission sustainability.

JESSE W. LAMARAND, Colonel, USAF
Commander
